Date of birth 5 April 2004 | Nationality Romanian

WORK EXPERIENCE

2026 – Present — Software Engineer (Freelance), BluePlan

Built and shipped Atlas (ai.blueplan.ro) end to end: retrieval-augmented chat over technical documents with hybrid dense, sparse and image retrieval fused with RRF, reranking and verbatim citations pinned to the source PDF. Multi-tenant, multilingual and in daily production use.

Technologies Python, FastAPI, Qdrant, React

2026 — Full-Stack Developer, Baseline Studios

Delivered full-stack features across multiple client applications (stratosphere.vip, pursuitofx.org, kabu.xyz) using TypeScript and React.

2025 — Software Developer, GeoDraw

Developed an AI-powered canvas for sketching and wireframing apps with React, TLDraw and LLM APIs, turning natural language into accurate real-time design output on the canvas.

April – June 2025 — Software Development Intern, Tvarita

Rebuilt and redesigned a server monitoring site for an optician clinic chain using React and Tailwind CSS, improving the user experience and significantly reducing load times.

EDUCATION AND TRAINING

Oct 2023 – June 2026 — BSc in Computer Science (English)

Babeș-Bolyai University, Faculty of Mathematics and Computer Science, Cluj-Napoca, Romania

Thesis: Hybrid post-quantum key exchange for WireGuard, the first FIPS 203-compliant hybrid WireGuard implementation on a production Rust codebase.

PERSONAL PROJECTS

2026 — pq-boringtun

Hybrid post-quantum key exchange for WireGuard: ML-KEM-768 alongside X25519 in the Noise IK handshake, built in Rust on Cloudflare's BoringTun and benchmarked on Apple M4 and Raspberry Pi 5.
github.com/mihaicristianfarcas/pq-boringtun

2026 — Supernova

Live-wallpaper engine for macOS in Swift 6: renders looping video, Shadertoy-style GLSL shaders transpiled to Metal and sandboxed web bundles behind desktop icons, with audio, cursor and motion reactivity, per-display assignment and smart playlists.
supernova-macos.vercel.app

2026 **eBPF Network Analysis System**

Network traffic classification for QUIC protocols, inspecting encrypted flows at the kernel boundary using eBPF with C, Rust and Python.
github.com/mihaicristianfarcas/ebpf-network-analysis-system

2026 **nvim-search-and-replace**

Project-wide search and replace plugin for Neovim written in Lua: async streaming ripgrep search, live before/after preview, selective replacement and its own undo/redo stack.
github.com/mihaicristianfarcas/nvim-search-and-replace

PERSONAL SKILLS

Mother tongue: Romanian

Other languages

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	C2	C2	C2	C2	C2
C2 Certificate of Proficiency in English (Cambridge English Assessment)					

Levels: A1 and A2: Basic user – B1 and B2: Independent user – C1 and C2: Proficient user
Common European Framework of Reference for Languages

Digital skills

- Programming languages: Rust, Go, Python, Swift, C/C++, Java, TypeScript/JavaScript, Lua, Shell
- Technologies and tools: React, Next.js, Astro, Tailwind CSS, FastAPI, PyTorch, LangChain, Qdrant, FAISS, PostgreSQL, eBPF, Metal, Git, Neovim, Cloudflare Workers

ADDITIONAL INFORMATION

Honours and awards: Honorable mentions in multiple mathematical logic and computational thinking contests (e.g. BEBRAS).
